

Front-End Development

I can create functional web pages and high quality landing pages using languages like HTML, CSS and Javascript and Typescript. I also use frameworks of them such as Angular.

- Angular
- Typescript
- Angular CLI
- Ngx Libraries
- HTML
- CSS
- Javascript
- Bootstrap
- PWA
- Responsive Design Implementation
- Web Application Development
- API

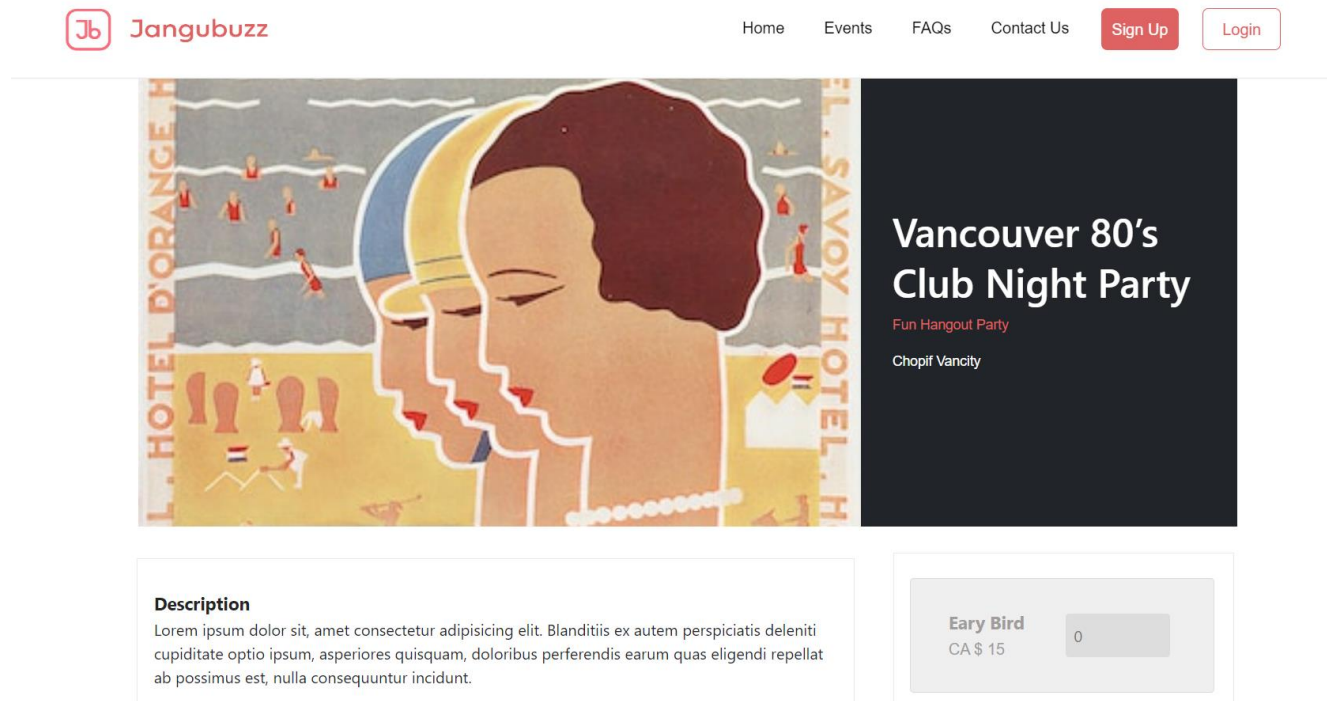

Rose Miller

My first priority is my clients' satisfaction and success

Let's start our collaboration right away

- Developed a web application for showcasing events and reserving tickets
- Applied Angular as Front-End framework and made a well-structured and modular app
- Applied Bootstrap which made it responsive
- Created Angular microservices to access to the events' database
- Made a restful api for the site's data to fetch data and send it to the Angular service

Upcoming Events

- Designed and developed a Landing Page for LOCOM inc. in London
- Applied Angular as the Front-End framework to make it scalable
- Used Bootstrap to make it responsive on all devices
- Applied Javascript and Typescript which made the whole site dynamic and functional

- Developed a website for movie streaming
- Applied Angular to divide the site into independent components which made it drastically maintainable and structured
- Fetched a Movie API and integrated it into the site to have updated and dynamic data
- Applied Bootstrap to make it responsive
- Added a search-movie page so users can dynamically search their movies

Watch Movie

Silver Linings Playbook

After spending eight months in a mental institution, a former teacher moves back in with his parents and tries to reconcile with his ex-wife.

Rate : 7.1

Watch Movie

Avatar: The Way of Water

Set more than a decade after the events of the first film, learn the story of the Sully family (Jake, Neytiri, and their kids), the trouble that follows them, the lengths they go to keep each other safe, the battles they fight to stay alive, and the tragedies they endure.
